Mel Rossi Rodrigues

Software Developer

Computer Science student with experience in backend development and web technologies.

Projects

Retro Video Game Management System ▷

Database Management System for COMP 380 Group Project

Sep 2024 - Dec 2024

Project Summary

Developed a Staff-Only System to manage a retro video games database using Python, JavaScript, and HTML/CSS.

Project Role:

Chief Backend Developer & Programmer
Cleaned up and maintained backend Python code
Responsible for designing backend logic and functionality for the system

DQN Atari Agent ▷

Reinforcement Learning Deep Q-Network Agent Training for COMP 542 Group Project

Oct 2026 - Dec 2026

Project Summary

Trained a Deep Q-Network agent to play Atari games using Python, Stable Baselines3 (SB3) and PyTorch.

Project Role:

Main Programmer
Cleaned and maintained code
Responsible for Set Up instructions and ease of use
Created initial project framework attempt using Dopamine before switching to Stable Baselines3 (SB3) and PyTorch

Education

California State University, Northridge (CSUN) ▷

Bachelor of Science in Computer Science

Expected Graduation: 2027

Relevant coursework:

(PHIL 230) Introduction to Formal Logic
(MATH 150A) Calculus I
(MATH 150B) Calculus II
(MATH 262) Introduction to Linear Algebra
(MATH 340) Introduction to Probability & Statistics
(COMP 110) Introduction to Algorithms & Programming
(COMP 122) Computer Architecture & Assembly Language
(COMP 182) Data Structures & Program Design
(COMP 222) Computer Organization
(COMP 256) Discrete Structures for Computer Science
(COMP 282) Advanced Data Structures
(COMP 333) Concepts of Programming Languages
(COMP 380) Introduction to Software Engineering
(COMP 310) Automata, Languages & Computation
(COMP 442) Machine Learning Principles
(COMP 482) Algorithm Design & Analysis
(COMP 542) Machine Learning
(COMP 440) Database Design
(COMP 484) Web Engineering I
